-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. This Office Action follows a response for pre-appeal brief request filed on August 27, 2007. No claims have been amended, cancelled or added.
2. After further consideration the prosecution has been reopened and the final rejection has been withdrawn.
3. Applicant's arguments, see pre-appeal brief request, filed on August 27, 2007, with respect to the rejection(s) of claim(s) 1-9 under 35 U.S.C. § 103(a) as being unpatentable as obvious over Watanabe et al. (U.S. Patent 6,44,913) in view of Ding et al. (CN 1123302 A) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of 35 U.S.C. §112, 1<sup>st</sup> paragraph.
4. Claims 1-9 are pending.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-9 are rejected under 35 U.S.C. §112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The independent claims 1, 8 and 9 recite "excluding an  $\alpha$ -olefin". This negative limitation was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. See **Ex parte Grasselli**: "Negative limitations which do not appear in the specification as originally filed and which introduce new concepts violate the description requirement of 35 U.S.C. 112, 1<sup>st</sup> paragraph. 213 USPQ 393 (Bd. App., 1983).

To the contrary, it is worth to mention that the Applicants clearly disclose that as the amorphous resin used in the present invention, known resins are used. Examples are amorphous polyester resin such as PETG, polycarbonate resin, polyarylate resin, acrylic resin such as polymethyl methacrylate and **polyolefin resin** such as polypropylene and polyethylene (the specification, page 6, lines 19-23).

### **Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Bernshteyn whose telephone number is 571-272-2411. The examiner can normally be reached on M-F 8-5:30.
